DETAILED ACTION

The following is an examiner's statement of reasons for allowance:

Boudreaux et al. (U.S. 6,625,026) and Smale (U.S. 6,538,892) both fail to disclose the following patentable limitations of the applicant's claimed and disclosed invention:

- a variable-height thermal-interface device and method for transferring heat from a heat source to a heat sink comprising:
- a first uniaxial rotary cylindrical joint comprising a first cylindrically concave surface in slidable contact with a first cylindrically convex surface;
- the first cylindrically concave surface and first cylindrically convex surface having a common first radius of curvature relative to a common first cylinder axis;
- the first cylindrically concave surface operable to rotate about the common first cylinder axis relative to the first cylindrically convex surface to compensate for uniaxial angular misalignment between the heat source and the heat sink;
- a first wedge interface having a first planar surface in slidable contact with a second planar surface, slidably contacting first and second planar surfaces inclined diagonally relative to the z-axis parallel to the shortest distance between the heat source and the heat sink; and

- a second wedge interface having a third planar surface in slidable contact with a fourth planar surface, the slidably contacting third and fourth planar surfaces inclined diagonally relative to the z-axis parallel to the shortest distance between the heat source and said heat sink.

The combinations of the claimed limitations are novel and found to be allowable over prior art. The cited reference taken singly or in combination does not anticipate or make obvious applicant's claimed invention.

Allowable Subject Matter

2. Claims 1-18 is allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
